SUMMARY

Enthusiastic and dedicated React.js/Next.js Web3/Web2 senior frontend developer with 4+ years of experience in creating responsive, user-friendly web applications. Proficient in leveraging React.js and Next.js ecosystem to build dynamic and interactive interfaces. Skilled in translating design mockups and wireframes into high-quality code, ensuring pixel-perfect implementation.

SKILLS / PROFICIENCY / KNOWLEDGE

- **Frontend Architecture** : React.js, Next.js (SSR/SSG), TypeScript, JavaScript (ES6+), HTML5, DOM
 - **State & Data Management** : Redux Toolkit (RTK), Context API, TanStack Query (React Query), RESTful APIs
 - **Web3 / Blockchain** : Wagmi, Viem.js, Ether.js, Web3.js, Reown AppKit, WalletConnect, LayerZero
 - **UI & Styling** : Tailwind CSS, Radix UI, Framer Motion, Material UI, Bootstrap, SCSS
 - **AI & Agentic Tools** : Cursor AI, Windsurf, Cline, GitHub Copilot
 - **Tools & Ecosystem** : Git/GitHub, Node.js, Jira, Figma, Webpack, Babel, Agile (Scrum)
-

ROLE / PROJECT / RESPONSIBILITE

Autonomint DApp (Web3), Senior Frontend Engineer, Autonomint Jan 2025 to Jun 2026

Multi-chain DeFi borrowing, lending, and options platform on Ethereum, Optimism, Mode, Base Sepolia, and Hyperliquid.

- Built a multi-chain DeFi dApp for depositing collateral and minting USDa with LayerZero cross-chain bridging across 5+ networks.
- Implemented borrowing forms with Yup validation, LTV calculations, real-time oracle pricing, and cross-chain transaction handling.
- Developed stock-covered call options module (NVDA, TSLA, MSTR, AAPL) with premium and strike price logic.
- Designed dashboard with deposit tables, DCDS positions, leaderboard, collateral charts, and portfolio metrics.
- Integrated smart contracts for borrowing, CDS/DCDS deposits, staking, and options via Wagmi + TanStack Query.
- Built atomic design system with Radix UI, Tailwind CSS, and Framer Motion for reusable multi-theme components.
- Engineered cross-chain bridge for USDA/USDT transfers with network switching, fee estimation, and tx tracking.
- Integrated Reown AppKit wallet, Notifi notifications, and AWS Secrets Manager for secure config management.

Trading App (Web3), Senior Frontend Engineer, Filament Finance.

May 2024 to Sep 2024

Trading application in sei blockchain with bonding and stacking.

- Developed a comprehensive trading application with integrated TradingView charts and order book functionality.
- Implemented order placing API integration with robust validation mechanisms to ensure accurate order execution.

- Built dynamic tables for order management, including tracking, updating, and displaying various order types, with seamless API integration for real-time updates.
- Integrated smart contracts for pool management and staking functionalities.
- Designed and developed a portfolio page to provide users with a detailed account overview and performance insights.

Clubrare, Frontend Engineer (Web3), Weblisto Technology.

Mar 2023 - Aug 2023

Nft selling website in ethereum blockchain

- Integrated REST API for fetching NFT data, ensuring efficient data retrieval and seamless integration with the platform.
- Implemented Web3 payment for purchasing actions, leveraging blockchain technology to facilitate secure and transparent transactions.
- Deployed the application on Vercel, leveraging its robust infrastructure for seamless deployment and scalability.

Traddible (Web2), Frontend Engineer, Weblisto Technology.

Aug 2023 - Dec 2023

Pokemon card selling website.

- Designed and developed a comprehensive Product Details Page to enhance user experience and facilitate informed decision-making.
- Engineered a dynamic Landing Page featuring a carousel list and banner, optimizing visual appeal and user engagement.
- Orchestrated seamless UI and API integration for enhanced functionality and performance on the collection page, ensuring smooth user interaction and data retrieval.
- Designed extensive TypeScript interfaces for managing data and inputs, promoting code scalability, and enhancing development efficiency.
- Transformed Figma designs into pixel-perfect web designs using Tailwind CSS and SCSS, ensuring high-fidelity implementation and consistent styling across the application.

Noddi car service, Senior Frontend Engineer, Weblisto Technology.

Jun 2023 - Oct 2023

Engineered the frontend for an on-demand car maintenance and doorstep detailing platform operating in Europe.

- Integrated REST API for fetching NFT data, ensuring efficient data retrieval and seamless integration with the platform.
- Implemented Web3 payment for purchasing actions, leveraging blockchain technology to facilitate secure and transparent transactions.
- Deployed the application on Vercel, leveraging its robust infrastructure for seamless deployment and scalability.
- Designed extensive TypeScript interfaces for managing data and inputs, promoting code scalability, and enhancing development efficiency.

Astroon NFT (Web3), Weblisto Technology.

Jun 2022 - Mar 2023

ICO Website in ethereum blockchain.

- Developed an ERC-20 token sale platform for both private and public users using Merkle tree-based Initial Liquidity Offering (ILO) for secure participation.
- Implemented token sale techniques including vesting and cliffing mechanisms to ensure controlled distribution over time.
- Enabled ERC-721 (NFT) sales, where purchases were facilitated through ERC-20 token deductions.
- Integrated CKEditor for blog creation, with a dedicated blog page for displaying published content.
- Built a reward claim feature, allowing users to claim tokens based on vesting schedules.

WORK EXPERIENCE

Autonomint Senior React.js / Next.js Developer Web3	Jan 2025 to Jun 2026
Filament Finance Singapore Senior React.js / Next.js Developer Web3	May 2024 to Sep 2024
Webllisto Technology Indore React.js / Next.js Developer Web2/Web3	Nov 2021 to Mar 2024

EDUCATION

B.Tech RAJIV GANDHI UNIVERSITY BHOPAL INDIA	July-2016 to 2021
---	-------------------
